

Mobile Visitation Station

Strike's Mobile Visitation Station is specifically built for the corrections environment. The unit is black powder coated, constructed of 14-gauge steel and has a large polycarbonate window that can be left clear or masked to match the size of the viewing opening to the size of the equipment selected. The unit has heavy-duty locking casters for easy mobility allowing it to be moved from one area to another and then locked in place when in use or placed in storage.

Louvered panels on the top and bottom provide air flow through the unit. A removable side panel, along with a removable viewing screen panel, allows access to the equipment. Security screws are used throughout to eliminate unauthorized access.

An included bolt-on shelf can be mounted to the front to allow a place for inmates to sign documents or rest papers.

Form meets functionality in the Mobile Corrections Video Station. The attention to detail and rugged construction means that you don't have to worry about the unit being destroyed in normal use. Welded panels and heavy-duty construction create a unit that can be used for years to come.

Camera and Monitor not included. Actual unit may vary from unit shown due to engineering changes.

Cabinet Specifications:

Exterior: 30"W x 62.5"H x 30"D

Interior: 24"W x 56.5"H x 24"D

Recessed power and network connections on back

Center Shelf:
